

Workshop on

Evidence-based Research: Gathering data for measuring impact

Tuesday, 21st November 2017, 10.00 - 14.00 h.

Place: Palau Macaya, Passeig de Sant Joan, 108, 08037 Barcelona

This activity is by invitation only. Five experts from different international centres and observatories will present the methodologies they use to gather data and evidence for their purposes: how they work, how they design their research and how they collect the data they later use in their observatories or studies:

- **Richard Garrett**, Observatory of Borderless Higher Education, UK
- **Emmanuel (Manny) Jimenez**, 3ieImpact – International Initiative for Impact Evaluation, USA
- **Geny Saavedra**, European Observatory in Good Practices in Strategic University Management, ESP
- **Katie Rose**, Centre for Public Impact, UK/USA
- **Donatella Persico**, Consiglio Nazionale delle Ricerche, CNR, IT
- **Karsten Krueger**, Fundación CYD – U-Multirank, ESP

Every speaker will have around 30 min, to present the model they work with to the audience. Invited participants, who have participated in previous seminars organised by the UNESCO Chair on the social and economic impact of online education, will discuss with the speakers.
